

**Source**, developing rural creativity has been set up to provide the creative industries in Fermanagh, Leitrim, Sligo and Roscommon together with international partners in Sweden the opportunity to market their products through a series of trade actions, training and a fully functional e-commerce website to showcase their products to a wider audience online ([www.ruralcreativity.com](http://www.ruralcreativity.com)).

This collection of inspired and original work is the result of a unique cross border and transnational initiative, funded by EU Structural funds under the LEADER + Transnational Action II Programme and led by the FLAG (Fermanagh Local Action Group), Arigna Leader of Leitrim/North Roscommon and Sligo LEADER Partnership.

*'Creative and craft activities can make a huge contribution to the economy of our rural areas and businesses. We are delighted to have secured funding to assist creative businesses to generate trade interest in products and increase sales through such a wide ranging trade development programme.'*
